Steel Gas Hobs 6

Glass Gas Hobs 20

Cooker Hoods 38

Built-In Ovens 55

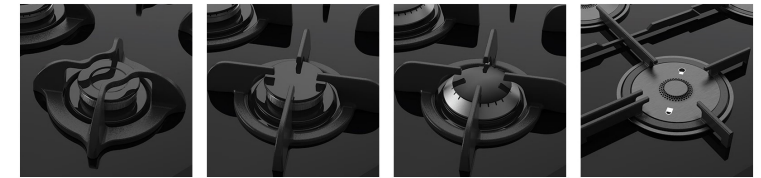

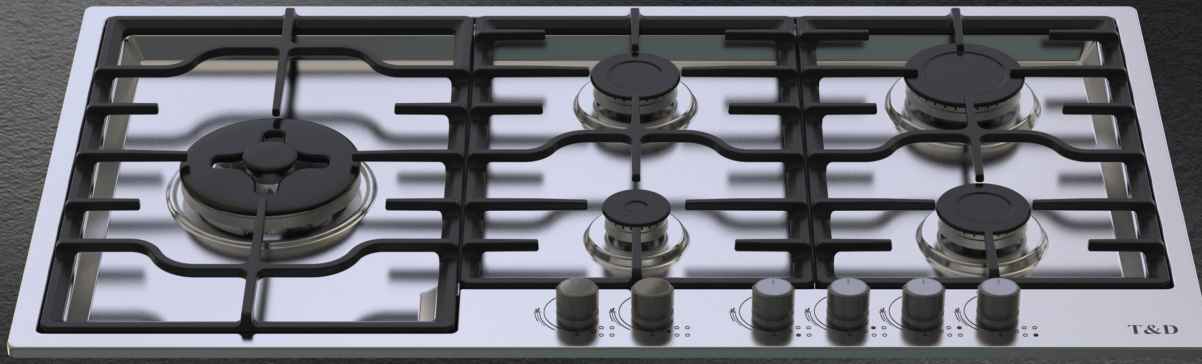

Sinks And Water Taps 69

## Gas steel cooktops

Design, technology and high-grade materials are the ingredients of a cooking range characterised by high functionality, professional performance and energy saving. T&D cooker hobs are offered in a wide range of built-in versions; moreover, the cooker hob can be incorporated into the custom-sized stainless steel worktop. T&D cooker hobs are made of AISI 304 stainless steel and come in a variety of finishes.

Type E

Sabaf S2

Sabaf S3

Series Flat

Dual wok

Triple ziglore E3

Type	Wok	Auxiliary	Rapid	Semi-Rapid
Type E	2.90 Kw	2.37 Kw	1.70 Kw	1.24 Kw
Sabaf S2	2.81 Kw	2.40 Kw	1.67 Kw	0.95 Kw
Sabaf S2	3.30 Kw	2.10 Kw	1.50 Kw	1.20 Kw
Flat	4.30 Kw	2.50 Kw	1.85 Kw	1.35 Kw
Dual Wok	4.80 Kw	-	-	-
Triple ziglore	3.50 Kw	-	-	-

## Safety in the kitchen

The ultra-rapid latest generation thermocouples make the burners even safer while the ignition time is reduced to the minimum.

### Flame Control

All T&D cooker hobs are equipped with safety valves. They shut off the gas supply very quickly if the flame accidentally goes out.

### Cast Iron Grids

All the T&D cooker hobs are equipped with cast-iron grids, a perfect material due to its many properties: high thermal capacity that improves the cooking efficiency; weight and stability that improve safety; sturdiness which keeps their look unaltered over time; easiness to clean.

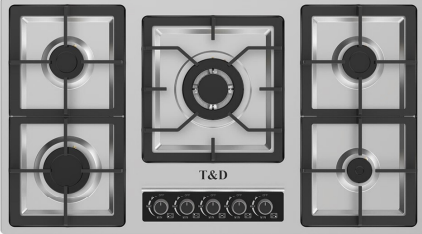

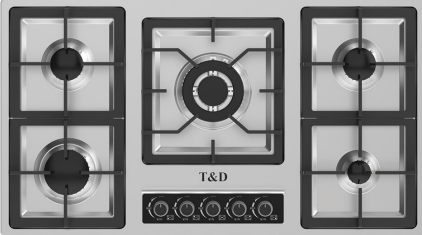

### Simple Ignition

Integrated in to the knobs, electronic ignition provides easy and simple ignition for gas burner.

 Dual wok burner

## Bolonia Series

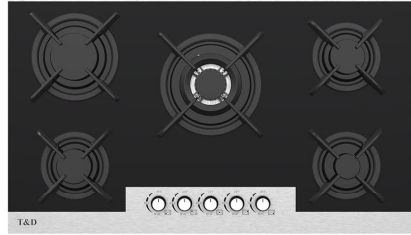

### Tempered glass

Tempered or toughened glass is a type of safety glass processed by controlled thermal or chemical treatments to increase its strength compared with normal glass. Tempering puts the outer surfaces into compression and the interior into tension. Such stresses cause the glass, when broken, to shatter into small granular chunks instead of splintering into jagged shards as ordinary annealed glass does. The granular chunks are less likely to cause injury.

Tempered glass is used for its safety and strength in a variety of applications, including passenger vehicle windows, shower doors, aquariums, architectural glass doors and tables, refrigerator trays, mobile phone screen protectors, bulletproof glass components, diving masks, and plates and cookware.

## Kitchen hood

Silent, efficient, modern and constructed using satin finish stainless steel, the same material comprising the cooker hobs and sinks. A T&D coordinated appliance enables you to express your style in every detail.

## Blower

Power and quietness are the two principal features of a cooker hood, even though they are often in contrast with one-another. The continuous strive for the best compromise is however nowadays able to achieve surprising results. All the T&D solutions have an outstanding suction power which makes them efficient and well-performing in all conditions of use, both in extracting and filtering modes. All this is achieved quietly, thanks to motors and aerodynamic solutions carefully studied to reduce the acoustic impact to a minimum.

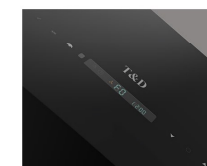

Turbo metal blower

Metal propellers

PP propellers

Switch panel

## A hood for every kitchen

A really complete range, with every kind of hood. Non only different looks, but also different functioning principles, in order to be able to choose the hood which fits each one's needs.

### Remote control

T&D hoods are equipped with a remote control.

### LED lighting

All of T&D hoods feature a LED lighting system.

### Metalic blower

T&D blower allow high air flow rates while maintaining a low energy consumption.

### Auto system

With the Auto function the hood has smoke sensors.

### Automatic door

Electrical automatic door

 LED lighting 2x3 W  
 Air flow rate: 700 m3/h  
 Motor power: 250 W

## Built-in ovens

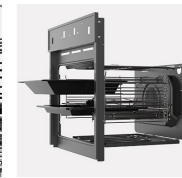

With a cooking chamber capacity of 60-78 litres and 5 different cooking levels, T&D ovens top their category for guaranteed capacity featured on a 60x60 cm built-in oven. XL means that those models feature a capacity exceeding 60 litres.

In many models the inside of the oven door constitutes a single smooth glass surface making it practical for cleaning purposes.

The Easy-Clean enamelling makes the internal oven surfaces and accessories non-adhesive, while the limited porosity ensures durability and easy cleaning.

Steel shelves

Telescopic guides

Series 3

Soft closing door

Touch panel

Knob control

Convection fan

Fast preheating

Cooling system

Telescopic guides

Meat probe

Cooking programs

Electric/Gas oven

3 ply glass

Usable capacity

Rotary roast

Defrost system

Easy clean

Heat element

Child lock system

- Multifunctional oven 60x60 cm, 78 litres capacity
- Touch controls
- Display with intuitive electronic programming
- Automatic cooking with programmed recipes
- Fast-preheating function
- Cooling system with tangential ventilation
- 2 fully extractable telescopic guides
- 4 ply tempered glass door
- Full-Glass door
- Removable inner glass
- Easy-Clean enamelling
- Rotary roast
- Safety shut-off system
- Aluminium door handle
- 5 shelf position
- Energy class: A
- Power supply: 220-240 V 50-60 Hz

## Sinks

T&D takes great care to use materials able to provide the best performance. Our entire range is made with AISI 304 - 18/10 and AISI 316 austenitic steels. Thanks to the high percentages of chrome and nickel they contain, they give a particularly bright finish, and make the products extremely sturdy and absolutely resistant to rust and corrosion.

## Built-in and beyond

The methods with which worktops can be built-in have become increasingly more varied and customized. T&D was the first sink manufacturer to have researched and used the new recessing methods and has thus acquired a great deal of experience. It now offers the most comprehensive range available on the market, with flush-mount, flat-edge and under-mount installation.

### Diamond-shaped bottom

water drainage on the bowl's bottom is an important feature, always well cared for on T&D sinks. In the squared-out, flatbottomed sinks, the draining is ensured by the elegant diamond-shaped creases that make the water flow easier.

### Spacious bowls

The bowls in many of the versions are more than 20 cm deep, thus sizeable and practical for all washing operations.

### Sturdy sinks

As a result, also owing to our long experience, we are able to construct "sturdy" sinks displaying a unique design. This icon marks the models with steel thickness of 1 mm.

### Glass doors

Tempered black glass door
